GENERAL

This report is part of the *Detailed Population Characteristics* series and presents cross-classifications of sample data from the 1980 Census of Population on social and economic characteristics of the residents of the State. In addition to data for the State as a whole, most tables present data for standard metropolitan statistical areas (SMSA's) of 250,000 or more inhabitants, and a few tables show data for central cities of these SMSA's. Selected tables show data for the rural population of the State. Most tables include data for race groups and for persons of Spanish origin for the State and for other areas in which the designated population group has 25,000 or more persons or is at least 10 percent of the total population. "White" is shown only when another race group qualifies. In tables 218, 219, 227, and 228 all race groups and Spanish origin are shown regardless of size. The abbreviated identification for this report is PC80-1-D (i.e., Population Census, 1980, Volume 1, Chapter D) followed by a number representing the State. A large portion of the information compiled from the 1980 Census of Population appears in Volume 1, *Characteristics of the Population*, of which this report is part. Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December

1975, and October 1976) which codified Title 13, United States Code.

The population figures for the various geographic entities shown here may differ from those shown in the *Advance Reports*, PHC80-V, and in the Public Law 94-171 redistricting data products. The differences reflect correction of errors found after the PHC80-V reports and P.L. 94-171 materials were prepared. The changes may affect any geographic area shown in this report. Differences may also result from the weighting technique used to inflate the sample figures shown in this report to 100-percent population control totals. For further discussion of the estimation procedure, see appendix D.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to an appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability for specific subjects appears in Appendix B, "Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and six appendixes), a table of contents, 58 detailed tables, and a map. A map of the State appears after the table

of contents and shows county names and boundaries, the names and boundaries of standard consolidated statistical areas and standard metropolitan statistical areas, the names and locations of all places with a population of 25,000 or more, and SMSA central cities with fewer than 25,000 inhabitants.

Each detailed table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title. The first table in this report is table 194; tables 1 through 13 appear in the *Number of Inhabitants*, PC80-1-A report for this State, tables 14 through 55 appear in the PC80-1-B report, *General Population Characteristics*, and tables 56-193 appear in PC80-1-C report, *General Social and Economic Characteristics*. The tables include detailed categories and cross-classifications of the social and economic characteristics collected in the 1980 Census of Population, including age, race, marital status, household relationship, education, labor force, occupation, industry, income, and poverty. A table finding guide shows the tables in which the various types of statistics appear.

Appendix A describes the various area classifications (e.g., SMSA's). Appendix B provides definitions and explanations for the subjects covered in this report. Appendix C explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix D presents information on the sources of error in the data, editing procedures, and a description of allocation and substitution. Appendix E contains facsimiles of the respondent instructions and 1980 census questionnaire pages showing population questions. Appendix F summarizes the data dissemination program of the 1980 census.

Introduction

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash “—” represents zero or a percent which rounds to less than 0.1.
- Three dots “...” mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals. (For further information on disclosure, see the section below on “Suppression of Data for Confidentiality.”)
- (NA) means not available.
- SMSA is standard metropolitan statistical area.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the

Bureau of the Census takes precautions that its published data do not disclose information about specific individuals and housing units. To accomplish this the Census Bureau suppresses data for characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below, may take place.

The general rules of primary suppression of sample data are as follows: estimates of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 30 or more persons in the geographic area; estimates of total housing units, vacant housing units, year-round units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown only when there are 10 or more year-round housing units in the geographic area;

characteristics of families, households, or occupied housing units are shown only if there are at least 10 occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least 10 and the number of renters is also at least 10. These primary suppression criteria are applied independently of one another. The comparable figures for complete-count (100-percent) data are 15 or more persons and 5 or more housing units of the specified type.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of examination. This level requires the 30-person or 10-housing unit criterion be applied individually to each race or Spanish origin category.

Finally, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction.

DETAILED POPULATION CHARACTERISTICS

ARKANSAS 5-5

CORRECTION NOTE

Corrections to the 1980 census counts of the total population have been made to some of the areas shown in this report. These corrections can be found in the correction note in PC80-1-A1, Number of Inhabitants, United States Summary, or PC80-1-B, General Population Characteristics. Individual State reports and United States Summary. Any additional corrections made after these reports were printed are available by writing to Data User Services Division, Customer Services (Corrections), Bureau of the Census, Washington, D.C. 20233.

Shown below are corrections to the population characteristics shown in the table(s) of this report.

Some figures shown in Table 204 on LABOR FORCE STATUS AND OCCUPATION are incorrect because resident staff of institutions were included as inmates of institutions who are not in the civilian labor force.

LABOR FORCE STATUS AND
OCCUPATION

NOT IN CIVILIAN LABOR FORCE
INMATE OF INSTITUTIONS . . .

OCCUPATION AND INDUSTRY - Tables 217 and 226

The 1970 data on occupation and industry have been redistributed according to the 1980 classification system; these redistributed data may not sum to the 1970 total "Employed persons 16 years and over" because a few employed cases allocated to "unemployed, last job armed forces" in 1970 have not been shown in the distribution.

MEANS OF TRANSPORTATION - Tables 232 and 233

In tables 232 and 233, the small number of workers using taxicabs as their principal means of transportation to work were incorrectly tabulated in the category "OTHER MEANS OR WORKED AT HOME" rather than in "PUBLIC TRANSPORTATION." The number of workers using taxicabs to get to work is available in PC80-1-C.
